

Here's a simple, beginner-friendly guide for making a classic **Dart Paper Airplane**, one of the easiest and best-flying paper airplane designs. It uses just one sheet of paper and only a few folds. [w](#)ikihow +1

What You'll Need

- 1 sheet of printer paper (Letter size 8.5" × 11" or A4)
 - A flat surface for folding
-

Step-by-Step Instructions

Step 1: Fold the Paper in Half Lengthwise

1. Place the paper vertically.
2. Fold it in half from left to right.
3. Press firmly to make a sharp crease.
4. Unfold it.

You should now have a crease running down the center of the paper. [w](#)ikihow +1

Step 2: Fold the Top Corners In

1. Take the upper-left corner and fold it down to meet the center crease.
2. Repeat with the upper-right corner.

The top should now look like a triangle or house roof. [w](#)ikihow +1

Before:

After:

Step 3: Fold the New Slanted Edges In

1. Fold the slanted left edge toward the center crease again.
2. Fold the slanted right edge toward the center crease.

This makes the nose narrower and sharper. [w](#)ikihow +1

Step 4: Fold the Plane in Half

1. Fold the entire plane in half along the original center crease.
2. The pointed nose should be on the outside.

The plane should now be long and narrow. [wikiphow +1](#)

Step 5: Make the First Wing

1. Lay the folded plane on its side.
2. Fold one side down to create a wing.
3. Leave about 1 inch (2.5 cm) of body below the wing.

Press the fold firmly. [dreamflightchari... +1](#)

Step 6: Make the Second Wing

1. Flip the plane over.
2. Fold the other side down to match the first wing as closely as possible.

Symmetry helps the plane fly straight. [foldnfly +1](#)

Step 7: Open the Wings

1. Open both wings outward.
2. Look at the plane from the front.
3. The wings should be level, like a capital T.

Flying Tips

If it dives down:

Gently bend the back edges of the wings slightly upward. dreamflightchari... +1

If it stalls and climbs too much:

Bend the back edges slightly downward. dreamflightchari...

For best distance:

- Make sharp, accurate folds.
- Throw it smoothly and firmly.
- Keep the wings even on both sides. dreamflightchari... +1

Quick Summary

1. Fold paper in half lengthwise and unfold.
2. Fold top corners to center.
3. Fold slanted edges to center again.
4. Fold plane in half.
5. Fold down one wing.
6. Fold down the other wing.
7. Open wings and fly.

This classic dart design is widely recommended for beginners because it's simple to fold and flies fast and straight.
